

DURAGARD[®]

SYNTHETIC BLEND

TO-4 SAE 10W-30

ALL SEASON TRANSMISSION, HYDRAULIC SYSTEM AND DRIVE SYSTEM FLUID

Duragard[®] Synthetic Blend TO-4 SAE 10W-30 is a proprietary formulation with select hydro cracked clear base oils and Very High Viscosity index (VHVI) synthetic base fluids that provide superior low temperature fluidity and high temperature film strength that cannot be achieved using conventional mineral base oils. Duragard TO-4 provides outstanding oxidation stability, improved elastomer compatibility, corrosion and rust control, outstanding shear stability, and excellent high-temperature film strength.

Duragard[®] Synthetic Blend TO-4 SAE 10W-30 is formulated for use in hydraulic systems, torque converters, final drives, powershift and hydrostatic transmissions, and other construction, off-highway contractor, farming, logging and mining equipment. They are also suitable for most automotive and industrial type hydraulic and gearbox applications. This oil meets requirements for CAT TO-4, ZF TE-MIL 03C, Vickers, and Allison C-4. Suitable for use with CAT TDTO.

Customer Benefits

- * Proprietary formula for exceptional service.
- * Excellent friction control and reduces clutch slippage and chatter.
- * High thermal & oxidative stability.
- * Excellent anti-wear properties.
- * Outstanding multi-purpose fluid
