

# PENETRATING OIL & RUST REMOVER

**REMOVES & PROTECTS AGAINST RUST**

## GENERAL AREAS OF APPLICATION:

BiRAL PO penetrates rapidly and very deeply into the innermost, normally inaccessible parts of rusted and seized components. Normal applications will free seized items in a few minutes. In extreme cases it is advisable to spray the component two or three times over a period of 20-30 minutes, allowing the PO to penetrate deeply, before attempting to loosen the item. Surface accretions of rust can be removed by spraying, allowing to soak for a few minutes and then gently removed by rubbing with copper or soft metal pads, emery paper or similar abrasive agents.

## Customer Benefits:

- \* BiRAL PO is regarded as the world's best penetrating oil and rust remover
- \* PO boasts exceptional penetration.
- \* PO rapidly eases seized bolts/threads.
- \* PO provides long term protection from rust.
- \* PO provides an excellent fine lube film.

## Properties:

Specific gravity at 15°C:	0.85
Viscosity: cST at 40°C:	15
ISO VG:	15
Color:	ASTM D 1500 1.0
Flash Point:	ASTM D 92°C 115
Pour Point:	-45°C

Product Code: BIR-PO-500ML-CASE      BIR-PO-500ML-S (single)
